**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

### **DETAILED ACTION**

This is in reply to Paper No: 10, received 1/7/03, in which applicant cancelled claims 1-33 and 40-45, and amended claims 34-39.

Claims 34-39 will be examined in this office action.

#### ***Claim Rejections - 35 USC § 112***

Upon further consideration, the rejection of claims 34-39 is withdrawn.

#### ***Claim Rejections - 35 USC § 103***

Upon further consideration, the rejection of claims 34-39 is withdrawn.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1654

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 37 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 37 recites: "...alignment variations thereof...", this is vague and indefinite. Please specify the alignment variations.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The Court of Appeals for the Federal Circuit has recently held that a "written description of an invention involving a chemical genus, like a description of a chemical species, "requires a precise definition, such as by structure, formula [or] chemical name', of the claimed subject matter sufficient to distinguish it from other materials" University of California v. Eli Lilly and Co., 1997 U.S. App. LEXIS 18221, at \*23, quoting *Fiers v. Revel*, 25 USPQ 1601, 1606 (Fed. Cir. 1993) (background material in original). To fully describe a genus of genetic material, which is a chemical compound, applicants must (1) fully describe at least one species of the claimed genus sufficient to represent said genus whereby a skilled artisan, in view of the prior art, could predict the structure of other species encompassed by the claimed genus and (2) identify the common characteristics of the claims molecules, e.g., structure, physical and/or chemical characteristics, functional characteristics

Art Unit: 1654

when coupled with a known or disclosed correlation between function and structure, or a combination of these.

Claim 37 recites: "... alignment variations...", this fails to met the requirement for written description, by not clearly defining the structure of the alignment variations of the invention.

Claims 38 and 39 are included in this rejection for depending on a rejected claim.

### ***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 34-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Klass, Developmental Biology, vol. 84, pp. 299-312, 1981. Klass teaches a major sperm protein from *C. elegans*, see page 299. While Klass does not specifically teach that the major sperm protein is capable of stimulating female sexual maturation, absent some evidence to the contrary, the major sperm protein disclosed by Klass would inherently possess this property.

### ***Conclusion***

All claims are rejected.

Art Unit: 1654

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
